

2427/207-104

thermoplastic layers having synthetic materials, said thermoplastic layers defining a volume and forming an outer component surface of a component within said volume;

natural fiber layers bonded with thermoplastic synthetic material; and

at least one reinforcing insert adjacent to said thermoplastic layers and said natural fiber layers, said at least one reinforcing insert having an open-pored fabric formed from fibers, said fabric penetrated from at least one side by melted synthetic materials of at least one of said adjacent natural fiber layers and said adjacent thermoplastic layers integrating into and reinforcing said at least one of said adjacent natural fiber layers and said adjacent thermoplastic layers.

Claim 13 (thrice amended). A motor vehicle component or perform produced from a multilayer composite, comprising:

thermoplastic layers having synthetic materials, said thermoplastic layers defining a volume and forming an outer component surface of a component within said volume;

Claim 15 (amended). The multilayer composite body according to claim 1, wherein said component surface is a molded-in functional element.

Claim 16 (amended). The multilayer composite body according to claim 1, wherein said component surface is a surface structure.

Add the Following Claim:
